

## Make your memories of a loved one count!

Did you know that the Town of Tiburon has a Commemorative Book? It is sponsored and maintained by the Heritage & Arts Commission, who welcomes new entries and will gladly walk you through the placement of an entry in the book.

### Goal:

To provide families, friends and the community with a means to effectively and thoughtfully commemorate loved ones, living or deceased, of any age. Each entry also serves as a history of the Tiburon Peninsula through these very personal stories.

### Eligibility:

The commemorated person must have donated to the town either a parcel of land, substantial funds for the purchase of that land, an item from the "gift list", or outstanding community service. Once that requirement has been met, that person, a family

member or a friend may then submit, for the Commemorative Book, a biography and a photo of the person to be honored.

### Types of Gifts:

Donations may be chosen from the Gift List in the information packet. Possibilities include assistance with the beautification of Tiburon Boulevard and other areas of Town such as annual flower plantings, sponsorship of an annual concert series, planting of trees and other creative ideas for commemoration.

### Invitation:

Come to the Town Hall, take a look at the Commemorative Book in the lobby, and pick up an information packet. Our hours are Monday through Thursday from 9:00 a.m. to 5:00 p.m. and Friday from 9:00 a.m. to noon. We look forward to seeing you!

# TOWN OF TIBURON NEWS

Volume 28, Issue 2

October, 2007

## Introducing "Tiburon Talk"

By Town Manager  
Peggy Curran

It is now eleven months that I've had the good fortune to be Town Manager here in Tiburon. In that time I have met a great many good people, gotten to know our wonderful town staff and had the pleasure of working with a truly dedicated Town Council. My thanks to all of you who have been part of this experience for me - I've learned a great deal!

One of the lessons here in Tiburon and, really, everywhere, is that it is almost impossible to over-communicate when it comes to government. People want to hear from the organization they support with their tax dollars about how things are going, what's around the bend and what's possible for the future.

These semi-annual print newsletters are offered in the spirit of direct communication. But, in this day and age, we can and wish to do more. So, we are inaugurating a new electronic newsletter which will be sent to interested parties monthly and perhaps more frequently over time. The advantage of electronic newsletters is their ability to be up-to-the-moment and cost-effective. While it certainly takes resources to develop useful copy for any newsletter, the electronic format makes this relatively simple. Even better, an electronic newsletter can be sent to hundreds of people with one key stroke - no postage required.

The new e-newsletter will be entitled...(drum-roll here)...*Tiburon Talk*. It will be a brief overview of what's current with your local government. More in-depth coverage will remain the province of these printed pages, and, of course, we all rely on coverage from our local newspapers to delve into the issues of the day. *Tiburon Talk* will have several regular categories including a few words from the Town Manager, news briefs, upcoming events, scheduled meetings and board and commission vacancies. News items will include links for more information when that is useful.

Below you will find information on how to sign up to receive the e-newsletter. And, for those who cannot avail themselves of electronic communiqés, we are willing to print one out and drop it to you in the mail. We don't want anyone to be left out of the loop!

## Town Council Staff Reports go Digital

As most of you know, the Town Council conducts the business of the town at its twice-monthly meetings on the 1st and 3rd Wednesdays at 7:30 p.m. at Town Hall. To assist the Council in its work, town staff produces staff reports. These reports contain useful background information and often outline options or recommend a particular course of action for the Town Council's consideration.

These reports have always been available to the public at Town Hall, but now they can be found on the town's website at [www.ci.tiburon.ca.us](http://www.ci.tiburon.ca.us). Just go to "Tiburon Top 5", right on the home page, and click on Town Council Agendas. Choose a meeting date and click on that agenda to find the item you are interested in. Agendas, minutes and staff reports are available in Adobe PDF format.

Staff reports are posted on the Friday afternoon prior to the following Wednesday's Town Council meeting.

We hope this new service is a convenience to all who follow Town Council activities, or would have if it were easier....Now it is!

PUBLIC WORKS DEPARTMENT

## IMPROVEMENTS TO STREETS, SIDEWALKS AND PATHS

*By Director of Public Works  
Nicholas Nguyen*

We are pleased to report that several projects are proceeding full steam ahead. While we all benefit from the improvements to our streets, sidewalks and paths, we understand that there will be some inconvenience. We ask for your patience, understanding and cooperation during construction. For more information, and for updates on street closures, contact the Department of Public Works at 435-7354.

### FAILED STREETS

Construction will begin in late September on the following streets: Bartel Court (from Venado to cul-de-sac), Lyford Drive (Acela Drive to Sugarloaf Drive), Red Hill Circle (Lyford to Lyford), St. Gabrielle Court (Sugarloaf to cul-de-sac), Santa Ana Court (Bartel Court to cul-de-sac), Paseo Mirasol (Via San Fernando to 800 feet north of), Reed Ranch Road (Tiburon Blvd. to East Terrace), Harbor Oak Drive (Mariner Way to End), Blackfield Drive (Karen Way to Via San Fernando), Esperanza Street (Cazadero Lane to End), and East View Avenue (Alcatraz Avenue to Main Street).

### REED RANCH ROAD INTERSECTION IMPROVEMENTS

A new refuge/acceleration lane is in the works to be constructed on Tiburon Boulevard at the intersection of Reed Ranch Road. This lane will provide a safe haven for motorists turning left from Reed Ranch onto Tiburon Boulevard. CAL/TRANS approved the engineering design and will issue the permits for this project in the coming months.

The work will consist of removal of the existing landscaped median island and then building the lane, a new raised median, and adding signing and striping. This is a long-deferred project which came about through

citizen input and professional traffic engineering, along with a technical assistance grant from the state.

### NEW SIDEWALK ON MAR WEST

Construction has begun on a paved sidewalk (bike/walking path) to be added between the Tiburon Peninsula Club and Tiburon Boulevard on Mar West. It should be completed by November. Additionally, Mar West between Tiburon Boulevard and Esperanza will be resurfaced this year, as will Esperanza between Mar West and Centro West.

### NEW PATHWAYS BETWEEN MCKEGNEY GREEN AND MULTI-USE PATH/BUS STOP

Plans are underway to make improvements to the existing paved connector path that runs between the multi-use path and the bus stop on Tiburon Boulevard, as well as for construction of a new decomposed granite path from the same bus stop to McKegney Green. Although staff is extremely upbeat about the ultimate success of this effort, the project is in the midst of a lengthy environmental review process and it will not go out for bid until Spring 2008.

## New Signage On Multi-Use Path

*By Associate Planner  
Laurie Tyler,  
Staff Liaison to the  
Bicycle/Pedestrian  
Advisory Committee*

Over the last few months, the Marin Municipal Water District (MMWD) has been installing a new water main along the multi-use path. The new pipeline replaces two smaller pipelines to assure the reliability of the water supply to the Tiburon Peninsula in the event of a major earthquake or fire. Once construction is complete, the path will receive a

much needed facelift.

A new, 10-foot-wide asphalt path will be constructed, and will include two decomposed granite paths on either side for use by joggers and walkers. New landscaping will use drought resistant plants recommended by members of the Beautify Tiburon Boulevard Committee.

The multi-use path is a scenic resource, enjoyed by Tiburon Peninsula residents as well as tourists. But many citizens have voiced concerns about speeding cyclists and an overall lack of courtesy on the path. In an effort to create a more user-friendly and safer multi-use path, new signage will be installed at 1/2 mile intervals along the path, beginning at McKegney Green and ending at Cove Road. The signage will be discreet so as not to detract from the beautiful pristine coastline and views of the Bay. The purpose of the signage is to provide courtesy guidelines to keep path users informed, safe, and within a clean environment.

For more information, contact Laurie Tyler at 435-7379, or ltyler@ci.tiburon.ca.us.

## Tony Iacopi Retires

After 18 years of outstanding service to the Town, Tony Iacopi has retired. Tony was hired by former Town Manager Bob Kleinert who wooed him away from his job as maintenance supervisor for the Reed Union School District.

Tony's first job with the Town was to train under then Superintendent of Public Works Lou Brunini. Tony assumed the Superintendent position two years later when Lou retired. His last position was Deputy Director of Public Works, a title that encompassed everything from responding to calls to quiet barking seals in the Bay to being a first responder with Tiburon police and fire personnel during winter storms and other emergencies.

Tony's talents were many; he brought skills as a carpenter, welder, plumber and contractor to the Department of Public Works. There are lasting mementos of his work all around the Town in contributions like the trellises that grace Zelinsky Park, the brick and stone work in the Ferry Plaza and the Paradise Drive traffic circle, and the reconstructed Tot Lot and Little Lady Gazebo at McKegney Green.

The Town Council honored Tony with a resolution of commendation and a farewell party at Servino's on August 3. Many citizens and community leaders shared their stories of Tony and how he was always willing to help them with any problem and assist with any communi-

ty project. Many said that he was truly the "go to" guy in Tiburon, and how he would be sorely missed.

## Zelinsky Playground to be renovated!

*By Playground Committee Member  
Pamela Bonnie*

The Playground Committee is planning a fun, community oriented fundraising event, "Pedal to the Playground," on Sunday, October 14th to raise money to renovate the Ed and Laleh Zelinsky Playground For School-age Children. (The committee previously raised funds for the Tot Lot Renovation Project.) The event will commence with a bike ride starting at Blackie's Pasture parking lot to the South of Knoll Park. At the park there will be food, entertainment, children's activities and more. Children's entertainer Tim Cain will perform at the event. The entry fee is \$25 per family.

Anyone interested in contributing can purchase a tile/paver, donate food or sponsor the event with financial support or volunteer to assist on the day of the event. For more information, see our ad below.

The South of Knoll Park Playground Committee members are: Pamela Bonnie, Derice Tao, Felicia Goldstein, Sunny Lyrek and Claire-Marie Laidley. They thank you for your support.

✎

## Leave Your Print at Tiburon's School-Age Kids'

✎

Join us for a special event on Sunday, October 14, at 11am to 1pm, as we "Pedal to the Playground!"

Local 2-6 year-olds are enjoying the new equipment of the Tot Lot at the beautiful, waterfront South of Knoll Park Playground. Now, we are planning the renovation of the adjacent Ed and Laleh Zelinsky playground for kids aged 5-12. We are asking the community to embrace this project and contribute to this worthy cause.

We are pleased to introduce a new handprint tile program. Your tax-deductible donation of \$250 or more will be recognized with a ceramic tile primed for you to decorate with your child's own handprint and name. These personalized tiles will be placed on a new wall constructed to recognize your contribution.

Please complete the form below and reserve your tile(s) today!  
Mail all contributions to:

**Town of Tiburon Playground Fund**  
1505 Tiburon Blvd., Tiburon, CA 94920

For more information, call 435-7354 or visit [www.southofknollparktiburon.com](http://www.southofknollparktiburon.com).

---

I support the renovation of the school-age kids' play area! Please note my donation and name(s) below.

**Donation:**

\_\_\_\_\_ 6"x6" handprint tile(s) @\$250 each

\_\_\_\_\_ 8"x8" design your own tile(s) @\$1,000 each

\_\_\_\_\_ Engraved Brick Paver @ \$5,000 each

\_\_\_\_\_ Other tax-deductible donation

# The Saga of Tiburon Boulevard

By Town Historian  
Branwell Fanning

Until 1931 Tiburon Boulevard, aka State Highway 131, terminated at San Rafael Avenue. The way into downtown Tiburon was via San Rafael Avenue, along the shore of Belvedere Island to Beach Road and Main Street. Construction had been underway since 1928 to extend Tiburon Boulevard to its present junction with Main Street and Paradise Drive, but it was slow going.

Fast forward to 1956: Marin County prepares a Master Plan for the development of the Tiburon Peninsula, including a revised Tiburon Boulevard. This was a four-lane, divided highway from 101 to downtown, continuing along Paradise Drive to Bluff Point (Keil Cove). The plan also included a four-lane ridge route connecting the tips of Blackfield and Lyford Drives. Our present bike path would have been buried under Tiburon Boulevard.

The first leg of the new four-lane highway, from 101 to Blackie's Pasture, was well under construction when we incorporated in 1964. The plan called for the highway from Trestle Glen to downtown to be on fill in the Bay. A cut in the hill between the Baptist Church and the Reedlands provided the fill for the portion from Blackie's Pasture to Del Mar. That fill is today McKegney Green and South of the Knoll Park. The bypassed section of Tiburon Boulevard was renamed Greenwood Beach Road.

That 1956 County plan anticipated a population of 30-50,000 people living in Tiburon. One of the goals of incorporation was to see that that would never happen. By selective rezoning and land purchases, we turned the potential subdivisions into open space, reducing the need for the expanded Tiburon Boulevard.

Tiburon Town Council meetings are never very well attended but we would get 400-500 residents to a meeting if Tiburon Boulevard expansion was on the agenda. The residents were overwhelmingly opposed to extending

the four lanes any further than Trestle Glen.

Two issues before the Council in the late 1960's converged. The railroad right-of-way became available and the State was ready to start construction of the next leg of Tiburon Boulevard. Power lines, sewer and water pipes are customarily buried under city streets. If Tiburon Boulevard remained a two-lane road, we would have had to endure a traffic mess any time there was utility work to be done if they were buried under it.

The debate was still on as to whether we should acquire the railroad right-of-way for a bike path. However, without the bike path as an alternative utility conduit we could not keep Tiburon Boulevard as two lanes.

Now, two sewer lines, one carrying Tiburon sewerage to a treatment plant in Mill Valley and a second carrying treated water back to an outfall at Paradise Drive, plus water lines serving all of Belvedere and most of Tiburon, as well as underground electric wires and communication cables have all found their way under our most scenic path, along with a few storm drains. I know residents do not like to see it torn up every few years; I know I don't, but try and picture Tiburon Boulevard with a flagman directing traffic every hundred yards or so any time one of these utilities needed work.

When potholes in Tiburon Boulevard become excessive, I am occasionally asked why Tiburon did not take it over from the State of California. In the past, the State would have gladly given it up. I was told by one CAL/TRANS executive that they have a network of interconnecting highways and Tiburon Boulevard was the "only cul-du-sac in the system" as it only connected to the network at one end. I reminded him that they had a state park (Angel Island) at the other end. He never raised the issue again.

This is important to Tiburon because gas tax funds are distributed by the State based on population, not the number of miles of road to be maintained. One resurfacing of Tiburon Boulevard would exhaust our road maintenance budget for many years with nothing left over for neighborhood streets. Keeping Tiburon Boulevard a state highway is vital to the town's fiscal health.

## TOWN MEETING SCHEDULE

### Town Council

7:30 p.m. at Town Hall  
1ST & 3RD Wednesday  
of every month

### Planning Commission

7:30 p.m. at Town Hall

# TIBURON POLICE DEPARTMENT

## Catching the bad guys

By Police Chief  
Michael Cronin

The Tiburon Police Department is exploring the use of video cameras to catch criminals and, in doing so, cut down on crime. Video surveillance at key locations on Tiburon Boulevard and Paradise Drive would likely help identify suspects for some of the crimes we experience on the Tiburon Peninsula, so they are worthy of consideration.

### The Concept:

Much of Tiburon has unique geography: Tiburon Boulevard, Trestle Glen and Paradise Drive are the only ways in and out. That fact leads to a promising concept: if we have passive cameras recording the flow of traffic as it comes and goes through these points, we may have an exceptional tool for solving crimes by capturing the perpetrator on video.

The cameras would be used to develop post-crime investigative leads. The department has no plans to use the cameras for "real time" enforcement of traffic laws or active surveillance of any roadway. Tiburon is a relatively "safe" community, and does not warrant such an expensive or intrusive change to our law enforcement practices.

### How It Would Work:

The majority of felony crimes committed in Tiburon are auto thefts and auto and residential burglaries. Experience tells us that most of these crimes occur after midnight and before dawn. They are most often committed by people who come into Tiburon during those hours from other Bay Area communities.

Picking them out from all the innocent travelers will take some effort, but in most cases police are able to determine a time frame of the occurrence, sometimes as short as several minutes. A review of the video following a reported crime will help the police identify the perpetrators or at least develop a short list of possible suspects from license plates.

This is especially true when the crime occurs late at night when there is very little

traffic. It is even more likely when victims or witnesses are able to give police a specific time and even a partial description of the perpetrator or their vehicle. In those instances police will be able to quickly pick out the vehicle and obtain the owner's information from the license plate. That's a valuable investigative lead that almost always results in the eventual identification of the responsible party.

Looking back over cases in the last few months suggest that video cameras placed on Tiburon Boulevard and Paradise Drive would have provided valuable leads and evidence in most of them. The cases have all been property crimes; auto theft, burglary and larceny. The video evidence gained in these cases would have been useful. In the event of a more serious crime, like a kidnapping, it would be priceless.

## To Stop Crime We Need Your Help!

By Sgt. Steve Hahn

A rash of thefts, burglaries and stolen cars has hit Marin County like a plague in recent months. The people we have caught are usually from neighboring counties and they tell us that they come to Marin to commit their crimes because our residents are easy targets. We have caught some of the suspects in the act but that hasn't stopped other bad guys from continuing to come in.

Most incidents occur during hours of darkness in residential neighborhoods. Sometimes the suspects break into cars but more often they look for unlocked cars. Cars with valuables in plain sight are the most likely to be targeted. Once inside a car the suspects search for valuables. If keys to the car are found, the car will be stolen. If keys to the house are found, the suspect's may try to enter the home to commit a residential burglary. This has occurred even when the residents are inside sleeping (We call this a "Hot Prowl" burglary). If the suspects find identity items like ID

### What Do You Think?

We want to stress that this is a concept to be explored and considered. We are not, and will not, move forward with the installation of any video cameras without substantial public airing of the question and direction from the Town Council. If cameras are installed, it will be important to have clear policies on how the videos will and, even more importantly, will not be used. Such a policy would have to create parameters for use that are consistent with the philosophy and expectation of Tiburon's citizens.

Do you have an opinion on this issue? If so, feel free to drop me a note or an e-mail (mcronin@ci.tiburon.ca.us). You can also watch for this item coming forward for public discussion at a Council meeting sometime later this year.

cards, credit cards, etc., the owner will probably end up being an identity theft victim.

Marin County and Tiburon in particular are very safe places to live, however, these property crimes are a serious concern to the Tiburon Police Department. We, along with other Marin County law enforcement agencies, have taken measures to increase patrols and focus other resources on the problem, but we really need the public's help in reducing these crimes. You can help by doing the following:

- Lock your car! – Even if it's in your own driveway.
- Take all valuables inside or lock them out of view in the trunk.
- Don't leave bags or backpacks in plain sight even if they don't contain valuables. Thieves may break into your car just to see what might be inside.
- Don't leave extra keys to your house or car in your vehicle.

Continued on page 5

## Contractors and Homeowners: It's time to Winterize your projects!

By Building Official  
Dean Bloomquist

As winter approaches with the onset of the "rainy season" in October, it is important for homeowners and their contractors to winterize unfinished projects,

The Town requires all contractors to employ Best Management Practices (BMP's) in order to prevent the discharge of construction wastes or other contaminants into the Town's storm drain system.

"Contaminants," are defined as any discharge not entirely composed of storm water, so it is especially important to have good housekeeping on and adjacent to your construction site in order to prevent storm water pollution. Allowing such pollution from your project site is not only illegal, it is often very expensive to remedy after a storm has occurred.

What can YOU do to prevent storm water pollution and bring your job site into compliance with the Town's code?

### Here are some suggestions:

- \* Schedule grading/excavation activities for dry weather periods only.
- \* Protect storm drain structures with berms or approved filters, and downstream drainage courses with drainage swales and/or silt fences.
- \* Control run-off amounts and velocities with appropriate use of temporary or permanent ditches, berms and check dams.
- \* Cover stockpiles of materials and excavated soils with secured tarps or plastic sheeting.
- \* Sweep paved surfaces that drain to storm drains, creeks or channels.
- \* Remove existing vegetation ONLY where absolutely necessary, and seed or re-vegetate slopes where construction is not immediately planned. Areas seeded after September 20 should also be treated with

erosion blankets, straw, netting or other appropriate means.

- \* Make your employees and subcontractors aware of the Town's ordinance and of their responsibilities to comply with BMP's.
- \* Employ other measures in accordance with published BMP's.

**Here's what YOU MUST DO** in order to comply with the Town of Tiburon's ordinance if your project is currently underway or planned between October 1 and April 30:

- \* **INSTALL** erosion and siltation control on or before October 1, 2007.
- \* **INSPECT** on-site erosion and siltation control facilities immediately before each storm to allow sufficient time to make needed corrections or improvements.
- \* **INSPECT** on-site erosion and siltation control facilities after each storm to correct any damaged or failed measures.
- \* **MAINTAIN** erosion and siltation control facilities on a regular basis to include silt removal at silt fences and sediment ponds, replacement of worn silt fence fabric, and seeding and mulching of areas which become denuded over time.

Additional erosion control measures you should be aware of (and be aware that there are penalties for non-compliance) are outlined in the Town's Winterization and Site Management Notice, available at the Building Division's public counter.

Random site inspections are made and failure to comply with the above requirements could result in an immediate job shutdown until appropriate measures are in place.

You are urged to implement these measures as quickly as possible to avoid unnecessary delays to your project. Remember, proper site winterization and adherence to BMP's is good for our environment and in everyone's best interest!

**If you have any questions,  
please call the Town's Building Division  
435-7380.**

## SENIOR SAFETY

By Jessica Power,  
Tiburon Fire Protection District

**Watch your step!  
Fall prevention**

### How big is the problem?

Falls are the most common cause of nonfatal injuries and hospital admissions for trauma.

More than one third of adults 65 and older sustain injuries from falls each year in the United States.

### What You Can Do to Prevent Falls?

1. Begin a regular exercise program.
2. Have your health care provider review your medicines.
3. Have your vision checked.
4. Make your home safer—
  - Remove things you can trip over from stairs and places where you walk.
  - Keep items you use often in cabinets you can reach easily without using a step stool.
  - Have grab bars put in next to your toilet and in the tub or shower, stairs, or anywhere you may need assistance while getting around.
  - Use non-slip mats in the bathtub and on shower floors.
  - Improve the lighting in your home.
  - Wear shoes both inside and outside the house.
  - Get up slowly after you sit or lie down.
  - Paint a contrasting color on the top edge of all steps so you can see the stairs better.
  - Arrange your furniture so that it is easy to walk around.
  - Maintain your floors so they don't become crooked or uneven.

### Other Safety Tips

Keep emergency numbers in large print near each phone.

Put a phone near the floor in case you fall and can't get up.

Think about wearing an alarm device that will bring help in case you fall and can't get up.

For more information, call the Tiburon Fire Department at 435-7200.

## Help Keep Tiburon Boulevard Median Strip *Beautiful!*

Several years ago, a group of citizens, businesses and civic organizations transformed the weed-strewn median strip from the freeway to Blackie's Pasture into a beautiful gateway to our community. This public garden does not maintain itself; we, the community, must provide funds to replant dead plants as well as maintain the rock drainage areas. These rocks have a tendency to disappear! The Town of Tiburon pays for most of the monthly maintenance but donations must cover the rest. Our needs are for plants, rock replacement and maintenance. WE NEED YOUR HELP!

### BEAUTIFY TIBURON BOULEVARD COMMITTEE

## We need your help

### Continued from page 3

- Make sure your house is locked up tight and keep some outside lights on. If you have an alarm, use it.
- Be aware! Report all suspicious activities immediately. We need to hear from you when a suspicious car, bicyclist or pedestrian is seen in your neighborhood, especially late at night. Please don't wait until the next day to tell us you heard or saw something the night before. We need to hear from you right away so we can take prompt action to find out if something nefarious is afoot that can be stopped or prevented. Call us at 789-2800 or 9-1-1.

Working together we can make Tiburon an even safer place to live.
